ABOUT LANTECH

With a long background in IP Ethernet products, Lantech brings the best network solutions for industrial and IP networks to the marketplace. The Lantech group is devoted to providing end user benefits & feature rich innovative high-quality networking solutions. We provide outstanding service and support to our world-wide partners & distribution network. Lantech provides high quality products with customer-focused services from our sales offices located in Taiwan, Australia, Germany, UK and Singapore.

Our core values are based on our firmware modularity development to meet with special requirement of projects as well as the continuous improvement of hardware to cope with different levels of certificate and criteria for various harden applications including rollingstock railway, trackside, vehicle, transportation, maritime, offshore, power substation, industrial surveillance. PoE (power over Ethernet) is one of key advantage solution which Lantech is good at DC-DC conversion built-in the switch and router that could have greater PoE budget and wider input voltage range.

Lantech products are successfully deployed around the world and used in all types of applications, including bus system in Spain, tram system in Finland, train in France and Germany, outdoor wireless surveillance system in Malaysia, military truck system in Vietnam, traffic networks in the UK and city surveillance system in Romania, etc.

As an IRIS-certified company, Lantech ensures that the quality of our products and services meets the high standards required by our customers worldwide and are suitable for use in the rail industry.

On-board Networking Switches for TCMS Communications

- Optional Railway Network Address Table (R-NAT) for OS4 models
- Smart Bypass Protection
- EN 50155:2017, EN 50121-4, EN 55032 and EN45545-2
- Wide Voltage Input 16.8~137.5VDC w/ Isolation
- Inrush Current Limit
- Up to 80W PoE w/PoE & System Isolation

Lantech DIN-Rail 10G Uplinks Managed Ethernet Switches

- 4 x 10G Uplinks Fiber or Copper*
- Optional L3/L3 lite Capacity
- USB Port for Backup and Configuration
- Built-in Power Converter (12VDC input / 24VDC input)
- Feed 30W Power - 802.3at Standard (PoE models)
- Configurable Power Budget (240W@48V; 120W@24V; 80W@12V)
- PoE Detection and Scheduling
- Built-in Environmental Monitoring
- Wide range operation temperature: -40~75°C/-40~167°F
- Fan-less design

*10G copper SFP: only used from 18V~57VDC power input, maximum two ports

Lantech EN50155 10G Uplinks Managed Ethernet Switches

- IP54/21-rated Aluminum Housing
- Inrush Current Limit
- L2+ or L3 Lite Management
- EN 50155 / EN 45545-2 Certified
- Wide Voltage 16.8~137.5VDC Isolated Input w/ PoE 80W Budget
- PoE Detection and Scheduling
- Built-in Environmental Monitoring
- Wide range operation temperature: -40~75°C/-40~167°F

Building Automation

Factory Automation

Process Control

Challenges

Historically, building owners in the market for a new Building Management Systems (BMS) have been forced to choose between one of several proprietary equipment manufacturers. Normally BMS equipment is fitted in compact wall mounted control cabinets that are distributed around the building, with most devices being DIN Rail mounted.

Our Solutions

The use of TCP/IP for BMS system communications has brought about increased choice in selecting products from different vendors in the same BMS system and reducing the associated cabling and network hardware costs. For cable runs which exceed the 100 meter limitation of Cat5e or for links between different buildings, a fiber optic link is the ideal solution.

IES-2208CA

8 10/100TX + 2 10/100/1000T/
Dual Speed SFP Combo
Industrial Managed Switch

- 100M/1000M Dual Speed SFP Fiber
- Pro-Ring 2se covers Single-Ring Topology
- Wide operating temperature range from -40°C to 75°C

Ethernet Connections

Accessories

Challenges

The most dynamic and challenging part for factory automation floor network is redundancy and real-time. Factory automation needs to be absolutely accurate because any interruption or delay could result in huge amount of lost, especially when the operation is non-stop, 7/24/365. On the other hand, to satisfy the rapid changing industry environment, manufacturing process must have high flexibility than before.

Our Solutions

Based on IP protocol, managers are able to control equipments and transmit data to SCADA, where connects with database and then generate statistic data for monitoring the operating status. As the equipments are all utilizing IP protocol and connect to the Ethernet, it's easier to integrate and change configuration through Internet. By collocating with Ethernet switches, managers are able to monitor the status, detect the failure, and solve the problem immediately.

IES-3408GSFP

4 1000FX + 8 10/100TX
L2+ Managed Ethernet Switch

- Wide range dual DC powered input with galvanic isolation
- Enhanced G.8032 ring protection
- Wide operating temperature range from -40°C to 70°C

Challenges

Water treatment process is essential for modern life to make water more acceptable and eliminating bad residues existing in many public sanitation systems then to return water back into natural environment without ecological impacts for the use of drinking water, industrial process, medical, hotel process and others.

Our Solutions

Using the industrial Ethernet network is the most convenient and reliable solution for water treatment system to connect with SCADA, PLC, water sensors, water pumps etc. Since the water treatment plant might cover huge floor space, the long transmission distance becomes one of the major considerations.

IGS-3204MGSFP

2 1G/2.5GSFP + 4 10/100TX
L2+ Managed Ethernet Switch

- Slim design
- Up to 2.5G Speed SFP Fiber
- Enhanced ITU G.8032 Ring
- USB port for backup & restore
- Wide operating temperature range from -40°C to 70°C

Why Choose Lantech?

FEATURE HIGHLIGHTS OF MUL

01

7-in-1 Multifunction

03

Highly Redundancy

LTE & WiFi client redundancy

Wi-Fi client & Wi-Fi client redundancy

LTE & LTE redundancy

LTE & WAN port redundancy

5-in-1 Wireless Modes

02

Up to 2 WAN + 4 LAN Ports

04

SIM Redundancy

2 SIM cards failover per LTE module

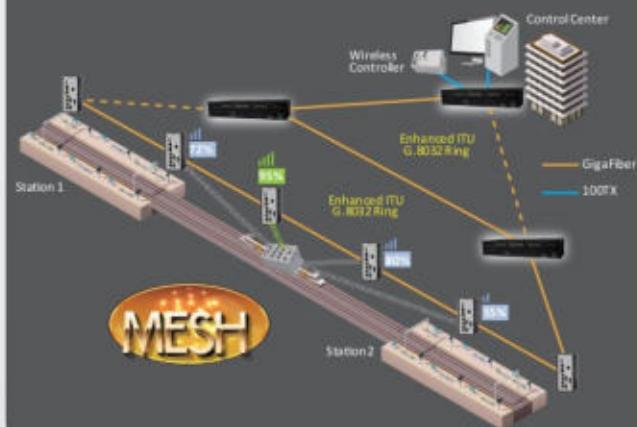

40 seconds

2 active LTE modules failover
(with 2 SIMs redundancy in each module)

05

802.11s Wireless Mesh Network

06

LAN Ethernet Ring Redundancy

on fiber

or on copper

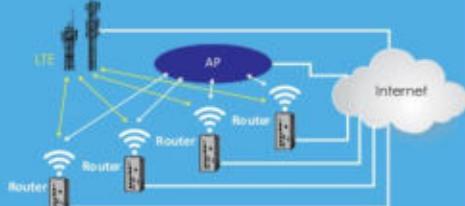

07

TI-FUNCTION ROUTERS

08

WAN-WAN Redundancy

DDoS & Firewall

Lantech's DDoS protection can effectively block all kinds of DDoS attacks

- ✓ UDP Flood
- ✓ TCP SYN Flood
- ✓ ICMP Flood
- ✓ Ping of death
- ✓ Distributed HTTP Flood

09

Industrial Solutions

Hardened Ethernet Connections

10

Load balancing on WAN ports

Fixed

Manually route by traffic type through fixed WAN links.

Priority

Routes connections through preferred WAN link while others stand-by. Sequentially activating other links if overflow occurs.

Fall Over

Routes connections through preferred WAN link while others stand-by. Sequentially activating another link if preferred link fails.

Weighted Round-Robin

Even distribution of the traffic over all working WAN links in circular order according to the specified weights.

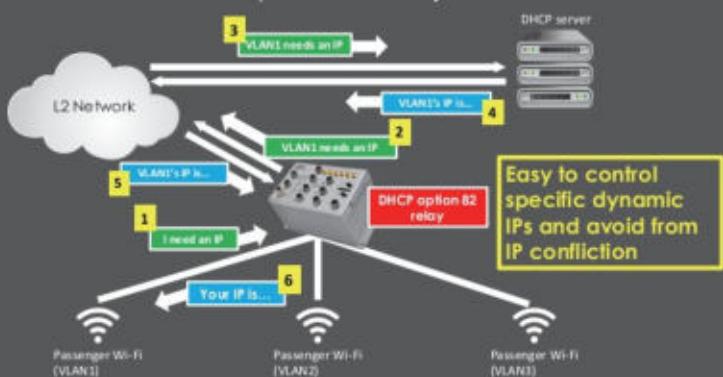

Custom Route

Routing through the selected WAN links for each specific traffic, ex: TCP/UDP port number and IP address.

Work as DHCP option 82 relay

11

QoS on WAN

By port: Filter by applications

By protocol: Filter by protocol

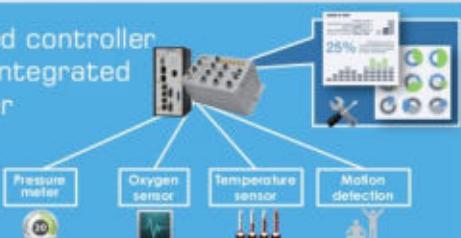

12

Full VPN support

13

Customized controller software integrated with router

14

15

Built-in Managed Switch Function

- ✓ Port Management
- ✓ QoS
- ✓ VLAN
- ✓ Multicast
- ✓ Redundant Protection
- ✓ Security

No need to purchase extra switches for a small network

Support Dynamic Route

Most competitors only support RIP

17

16

Supports IPv6

- ✓ Resolve IP Address space exhaustion
- ✓ Elimination of NAT
- ✓ Makes routing more efficient
- ✓ Simplified Network Configuration and easier to management

Integrated PoE Functions

PoE Detection Monitoring power consumption, voltage, current and temperature in real time

PoE Schedule Customize the schedule to ON/OFF PoE

Power Budget Management

18

Ignition sensing on 3000 series to extend the operation time when engine is off

Engine is off → Extended operation time → Router shut down

19

Optional eSIM

22

Double isolation design to minimize the risk of surge, EFT at input, PoE and serial ports

20

802.11AC 3Tx3R Wi-Fi

Multi-channel 3Tx3R Wi-Fi 11ac for maximum communication bandwidth

433Mbps x3 = 1.3Gbps

21

Optional EMMC storage inside router

8GB 16GB 32GB

23

24

LTE Status Timeline

To check the LTE status at a glance

Superior LTE Performance

Reliable brand

LTE module is powered by
SIERRA WIRELESS

High compatibility

- APAC model for Asia & Oceania
- EUNA model for Europe & North America
- WW model for worldwide

5000 Series Routers

3000 Series Routers

Why Choose Lantech?

FEATURE HIGHLIGHTS OF HARDENED &

01

Optional Layer 3 Lite (L3L)

1. Inter-VLAN Routing

Route traffic between different VLAN by implementing a switch with routing function in the network.

OS4 Platform
OS3 Platform

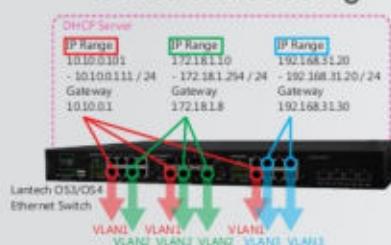

2. Router-on-a-stick

A type of routing configuration in which a single physical interface set as VLAN trunk port manages traffic between multiple VLANs from edge site.

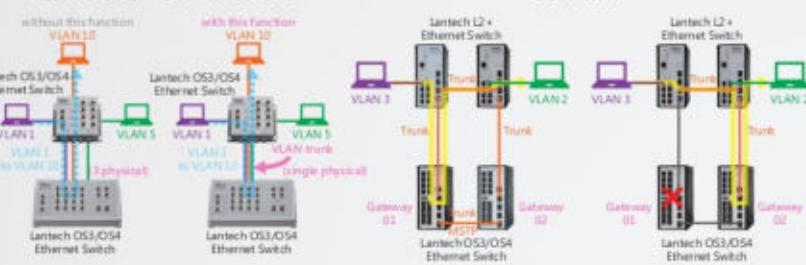

3. VRRP

Provides automatic assignment of available VLAN gateways to participating hosts and increases the availability and reliability of VLAN routing paths via automatic default gateway selections on different VLAN groups.

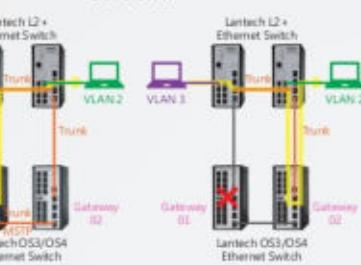

1. Inter-VLAN Routing

2. Router-on-a-stick

3. VRRP

Optional Layer 3

1. OSPF

Open Shortest Path First (OSPF) protocol is an Interior Gateway Protocol used to distribute routing information within a single Autonomous System.

2. RIP

Routing Information Protocol (RIP) is a dynamic routing protocol which uses hop count as a routing metric to find the best path between the source and the destination network.

3. PIM

Protocol-Independent Multicast (PIM) is a family of multicast routing protocols for Internet Protocol (IP) networks that provide one-to-many and many-to-many distribution of data over a LAN, WAN or Internet.

4. DVMRP

Distance Vector Multicast Routing Protocol (DVMRP) is a routing protocol used to share information between routers to facilitate the transportation of IP multicast packets among networks.

OS4 Platform
OS3 Platform

02

Maritime

Industrial & Outdoor

08

Smart Bypass Protection (Optional)

The bypass relay is set to bypass the switch to the next one when power is off or CPU hanged to prevent network disruption.

10

10GbE Connectivity

- To fulfill Huge Bandwidth Requirement

11

Integrated PoE Functions

PoE Detection

Monitoring power consumption, voltage, current and temperature in real time.

PoE Schedule

Customize the schedule to ON/OFF PoE

PoE Budget Management

09

Inrush Current Protection

The inrush current on initial power up can be limited lower than 10 x nominal current and for less than 1ms.

12

USB port to upload & download the configuration file

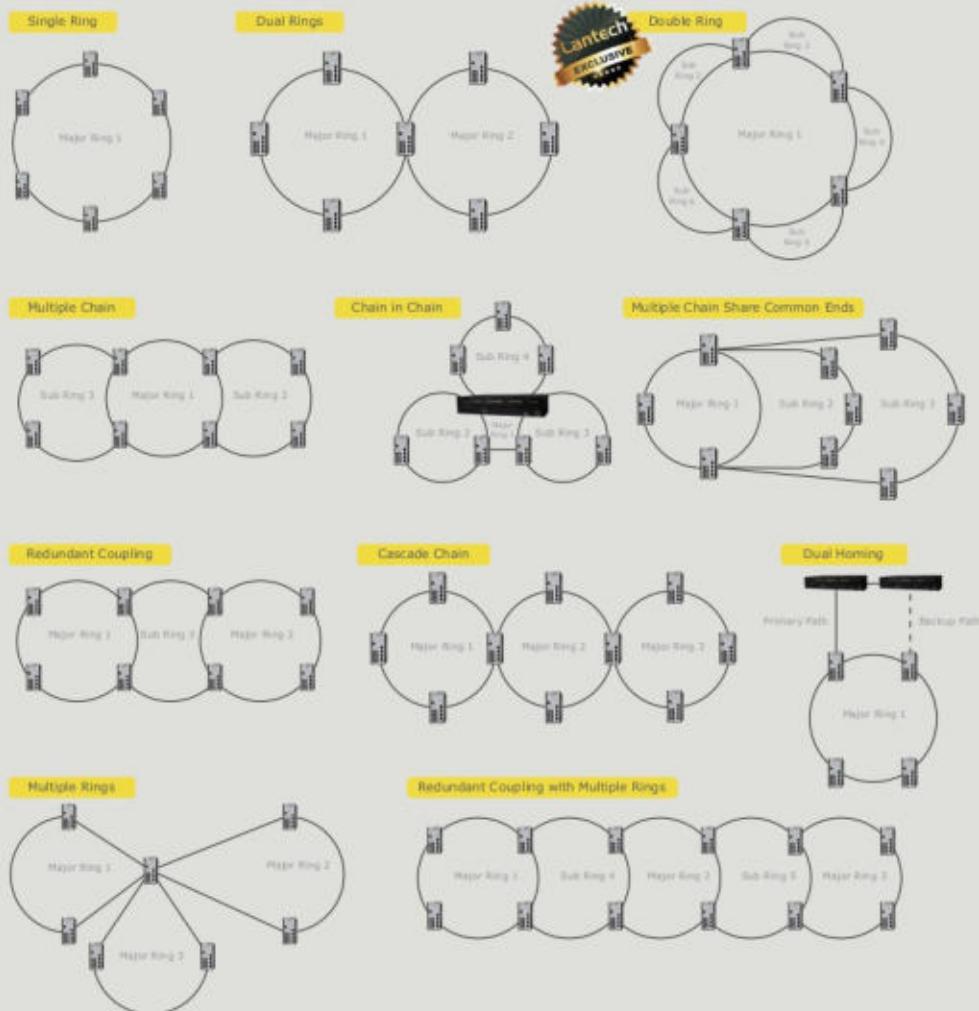

13

Enhanced ITU G.8032 Ring

OS4 Platform
OS3 Platform
OS2 Platform
OS1 Platform

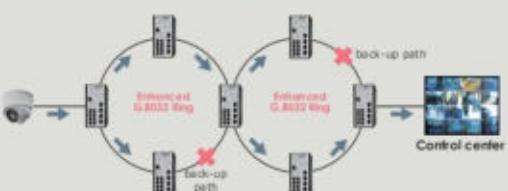

Established by ITU (International Telecommunication Unit), the G.8032 protocol is compatible with Ethernet standard and has been supported by many major Ethernet system providers. With our long background in IP Ethernet industry, Lantech is proud to present our enhanced ITU G.8032 ring which covers multicast & data recovery.

Lantech G.8032 ring has basic, auto, enhanced, multi-train mode.

Basic	Compliant with 3rd party ERPS switch, recovery time <100ms
Auto	Single ring auto-select each role
Enhanced	Support data/ multicast recovery <20ms in single ring
Multi-Train	Support auto dynamic coupling

Enhanced Ring for Multicast Recovery

What's the difference?

Industrial L3/10G (PoE) Ethernet Switches

High Performance 10G Ethernet Capacity

To fulfill huge bandwidth requirement, Lantech OS4/OS3 IP30 switch series provides up to 4-port 10G Copper or Fiber uplinks.

Flexible Modularity & L3 Upgradable**

Lantech provides highly customized modular models to satisfy all kinds of needs, from 100TX to dual speed SFP. All OS3 series models are able to upgrade to Layer 3.

Feed up to 60W Power – PoE (PoE model)

The PoE models support IEEE802.3at standard which is able to feed up to 30W at each PoE port, while PoE-PBT models support IEEE802.3bt standard that delivers 60W per port.

PoE Detection and Scheduling (PoE model)

PoE detection can detect if the connected PD hangs and then restart the PD; PoE scheduling allows pre-set power feeding schedule upon a routine time table. Each PoE port can be enabled/disabled, get the voltage, current, Watt, and temperature info displayed on WebUI. It saves both time and energy. Built-in power converter is able to boost up from 12V/24V, and step down from 110V (vary on models).

Configurable Power Budget (PoE model)

To prevent over consumption that causes the system to become unstable, Lantech PoE switches are able to control the power budget by limiting the total power consumption for all connected PDs. Each port's power limit can be defined as well.

Built-in Power Converter

Normally in vehicle environments, 48V power supply is not available. The built-in power converter is able to boost up from 12V (car), 24V (bus), and step down 110V, making the devices function well.

Complete Protection for Stable Operation

Not only designed with inrush current protection, the over voltage protection also ensures the switch to sustain instantaneous high voltage of up to 160VDC.

USB Port for Backup and Configuration

With the special-designed USB port, backup / restore configuration is easier than ever! Simply plug in the USB thumb drive and the system will automatically detect and decide the action. No laptop or console needed.

Industrial Unmanaged (PoE) Ethernet

Built-in Power Converter

Normally in rolling stock and vehicle environments, 48V power supply is not available. The built-in power converter is able to boost up from 12V (car), 24V (bus), and step down 110V (train), making the devices function well.

Feed 30W Power – 802.3at (PoE model)

IEEE802.3at standard is able to feed up to 30W to each PoE port, which is twice as the previous 802.3af standard. It's ideal for big power consumption devices such as PTZ IP cameras, High power wireless AP, etc.

E-Marking Certified

The E-marking certificate makes it the most suitable PoE switch for bus, carriage, other vehicles application as well as for industrial areas where the power source is limited with 24V but has demand of IP surveillance or VoIP applications. (24V model)

Industrial IEC 61850-3 Ethernet Switches

IEC 61850-3 / IEEE 1613 Certified

The series complies with the strict substation-rated standard of IEC 61850-3 and IEEE 1613. It is able to help against electrical interference and meets communication requirements for network equipment used in power substations. For example, the switch was tested with high ESD of up to 8K (contact) and 15K (air).

Zero GOOSE Message Packet Loss

The series supports standardized GOOSE messages that ensure the most critical packets are transmitted. The manager is able to receive and react in unexpected accidents in real time without any packet loss.

IEC61850-90-4 switch data modeling

Lantech IEC 61850-3 model embeds a MMS server based on IEC61850-90-4 switch data modeling for power SCADA that allow power SCADA to control and monitor the switch without additional NMS.

Industrial E-marking / ITxPT Transportation Routers & Switches

E4 E13

What is E-marking?

The e-mark is an EU mark for approved vehicles and vehicle components sold into the EU.

ITxPT

INDUSTRIAL TRACTION SYSTEMS

What is ITxPT?

ITxPT defines the physical interfaces between on-board systems, including general architecture, generic mechanisms with the communication protocols.

Adapter Cable

BB50-102 (USB Adapter)

Part Number

USB adapter (BB50-102)	8 pin M12 (Male) A-coded 180 degree M12 to USB 2.0 interface adapter, 8cm
USB adapter set (BB50-103)	8 pin M12 (Male) A-coded 180 degree M12 to USB 2.0 to DB9 (Female) Cable, 150cm + USB NIC

Bracket

MBAK19004

MBAK19005

MBAK19006/MBAK19007

Part Number	Description
MBAK19002	L-Bracket that can change 90 degree of DIN rail mounting
MBAK19003	Wall mount bracket for 74 (W) x 105 (D) x 152 (H) / 74 (W) x 135 (D) x 152 (H) / 96 (W) x 105 (D) x 152 (H) mm industrial switch
MBAK19004	19" Rack Mounting Kit for 74 (W) x 105 (D) x 152 (H) / 74 (W) x 135 (D) x 152 (H) mm industrial switch
MBAK19005	19" Rack Mounting Kit for 35 (W) x 105 (D) x 152 (H) / 43 (W) x 105 (D) x 152 (H) mm industrial switch
MBAK19006	Side DIN Rail mounted fin for 74 (W) x 105 (D) x 152 (H) mm industrial switch
MBAK19007	Side DIN Rail mounted fin for 74 (W) x 135 (D) x 152 (H) mm industrial switch
MBAK19008	Wall mount bracket for 35 (W) x 105 (D) x 152 (H) / 43 (W) x 105 (D) x 152 (H) mm industrial switch
MBAK19009	Side DIN Rail mounted fin for 74 (W) x 135 (D) x 152 (H) mm industrial switch
MBAK19010	19" Rack Mounting Kit for 35 (W) x 105 (D) x 152 (H) mm industrial converter
MBAK19011	L-Bracket for Mounting MBAK19010 with the industrial converter

Note: 1. Load regulation is measured on the rated output current. 2. Load regulation is measured at 20% to 100% of rated load at 120VAC input.

3. Ripple & noise is measured by using a 0.01uF/0.01mH test capacitor in a 4-Pin ammeter capacitor parallel on the test points, at rated load and 115VAC input.

4. Efficiency is measured at rated load and 115VAC input.

5. Standard Operating Temperature = -40°C ~ +80°C ambient, derating each output at 0.5% per degree from 0°C to +70°C, which means the output is 95 Watts at +70°C.

6. Rated Operating Temperature = 0°C ~ +70°C ambient, derating each output at 0.5% per degree from 0°C to +70°C, which means the output is 95 Watts at +70°C.

*Note: Starting time of all model is 1.0 ms.2 seconds at -40°C

Cable

Part Number	Description	Pin Number	Type	Length	Gender
ECONM12-5P(F)70CM CABLE	A-coded 90° Power Cable	5	M12	0.7M	Female
ECONM12-5P(F)1.5M CABLE	A-coded 90° Power Cable	5	M12	1.5M	Female
ECONM23-5P(F)70CM CABLE	A-coded 90° Power Cable, Made in Taiwan	5	M23	0.7M	Female
ECONM23-5P(F)70CM CABLE-C	A-coded 90° Power Cable, Made in China	5	M23	0.7M	Female
ECONM23-5P(F)1.5M CABLE	A-coded 90° Power Cable, Made in Taiwan	5	M23	1.5M	Female
ECONM12-4P(F)1.5M CABLE	A-coded 90° Power Cable	4	M12	1.5M	Female
ECONM12-08M2-CONSOLE	A-coded 180° to RS232 cable for console	8	M12	1.5M	Male
ECABM12XB3MSTP	X-coded Shielded Twisted Pair (STP) Cable	8	M12	3M	Male
ECAB124030MJS	D-coded Shielded Twisted Pair (STP) Cable	4	M12	3M	Male
